Introduction Undergraduate Project 1 & 2
(PSM 1 & PSM 2)

This course is research courses and designed to synthesize the knowledge and skills in the educational field and apply them to produce a research report for the Undergraduate Project. The Undergraduate Project is the major undertaking that demonstrate mastery to the field of study and contributes knowledge to the field. Students will focus in all aspects of developing and carrying out the research for Undergraduate Project. Besides of formulating comprehensive introduction or Basis for the Study, or Orientation to the Problem, Defining the Problem Statement, Writing the Hypotheses or Questions, Writing the Review of the Literature (building a case for the need for the study) and Articulating the Study Design, students are required to analyse data, interpret the results and draw discussions, conclusions and recommendation in this Undergraduate Project. Working closely as appropriate with their supervisor/advisor, at the end of the course, students are able to submit a complete Undergraduate Project and align with the policies and guidelines published by the University.

Objectives :

- i Write a research report by compiling the knowledge, skills and application in the area of study and research problem
- ii Present the defined research idea, and defend arguments with confidence using various media
- iii Analyse the qualitative/quantitative data collected confidently using appropriate software or digital tools
- iv Adhere to the known solutions of the research problem based on the systematic research methodology
- v Display a complete research project report implementing change for improvement ethically
